

18th April

10.00: Meeting and departure of the excursion to Stodthagen Wald

19th of AprilSession chair: Oliver Nelle

9:00 – 9:45	Hans-Rudolf Bork (Invited speaker)	Contributions of geoarchaeology to pedoanthracological researches
-------------	---------------------------------------	---

9:45 – 10:30	Marie-Claude Bal-Serin (Invited speaker)	Open landscapes: the origin of the vegetation change from pedoanthracological and fire signal analyses in the Pyrenees (north and south slope), Massif central and Sierra de Gredos
--------------	---	---

10:30 – 11:00	COFFEE BREAK	
---------------	--------------	--

11:00 – 11:30	Bobek Přemysl	Fire disturbance-driven vegetation dynamics under the sandstone landscape conditions in Northern Bohemia
---------------	---------------	--

11:30 – 12:00	Vincent Robin	Soil charcoal analysis: some recurrent questions and attempts of answers
---------------	---------------	--

12:00 – 13:30	LUNCH BREAK	
---------------	-------------	--

Session chair: Vincent Robin

13:30 – 14:00	Thomas Feiss	Determining the minimal sampling effort for pedo-anthracological studies: what does additive partitioning of spatially constrained accumulation curves teach us?
---------------	--------------	--

14:00 – 14:30	Freddy Damblon	Dating charcoal from palaeosols and loess deposits: new challenges
---------------	----------------	--

14:30 – 15:00	Raquel Cunill Artigas	Woodland history of Ste-Croix-Volvestre fir wood (Ariege, France) by interdisciplinary approach. A late Holocene palaeo-environmental reconstruction.
---------------	--------------------------	---

15:00 – 15:30	Juan Manuel Rubiales	Vegetation history in the mountains of Gredos (Central Spain) during the last 5000 years: palaeoecological evidences, uncertainties and the pedoanthracological approach
---------------	-------------------------	--

15:30 – 16:00	COFFEE BREAK	
---------------	--------------	--

Session chair: Marie-Claude Bal-Serin

16:00 – 16:30	Oliver Nelle	Origin and continuity of dry grasslands in Western Europe, investigated by soil charcoal
---------------	--------------	--

16:30 – 17:00	Doris Jansen	Influence of fragmentation and quantities of determinations on charcoal data – Results from pedo- and archaeological samples
---------------	--------------	--

17:00 – 17:30	Tim Schroedter	Charcoal from alluvial profiles and drillings in the Malatya plain, southern Turkey. Results of a first (promising?) attempt
---------------	----------------	--

17:30 – 18:30	General discussion	
---------------	--------------------	--

20th April

9.00-13.00: Microscope session
