

Dr Pascale DELANGLE
Laboratoire "Chimie Inorganique et Biologique"
Université Grenoble Alpes – CEA
Institut Nanoscience et Cryogénie / SCIB, UMR-E3, Grenoble France
Email : pascale.delangle@cea.fr

Researcher at CEA Grenoble since 1997

Leader of the group "metal-peptide interactions" since 2005.

Research topics: Peptide design for selective metal ion chelation

- **Cu(I) selective chelators**, inspired from proteins involved in copper homeostasis and targeted at the hepatocytes, to treat localized copper accumulation in the rare Wilson's disease.
- **Lanthanide-binding peptides** as magnetic or luminescent probes for DNA recognition.
- **Actinide-binding peptides** to mimic actinide's interaction with proteins to understand the molecular mechanisms responsible for their toxicity and to design peptide-based detoxification agents.

Education

- 2005** Habilitation à Diriger des Recherches (University of Grenoble)
"Selective complexation of metal ions: key-parameters for affinity and selectivity"
- 1996** PhD in Chemistry (Ecole Normale Supérieure de Lyon)
"Design and study of novel receptors for metal cations: phosphorous hemispherand and cavitand"
PhD supervisor: Dr Jean-Pierre Dutasta

1989-1993 Student at the Ecole Normale Supérieure de Lyon

Other professional experiences

- 1993-1997 Teacher at the Ecole Normale Supérieure de Lyon
1998- 2014 Teacher in Licence and master at Grenoble University
2012-2013 Organisation of two international conferences (IMBG 2012 and ICBIC16)
