Presently, I hold the position of an Associate Professor within the PUCV Department of Agriculture and Food Sciences. My primary research objectives revolve around gaining insights into the fundamental mechanisms that regulate plant behavior within a dynamically changing environment. Currently, my specific focus lies in examining the soil-root interface, delving into the biophysics and mechanics governing the behavior of intricate porous materials exposed to various stressors, including drought, salt, and mechanical deformation. Given the challenging landscape ahead for agriculture, my research program is dedicated to furnishing valuable information tailored for growers situated in arid and semi-arid regions, aiding them in their decision-making processes. Additionally, I am concurrently serving as the Director of Graduate Studies at the university.

Education

Ph.D. 2017

University of California, Davis.

Dissertation: *Physiological and Anatomical Responses of Grapevine Roots to Drought Stress and Recovery after Re-watering.*

Supervisor: Dr. Andrew J. McElrone

M. Sc. 2012

Pontificia Universidad Católica de Valparaíso, Chile.

Thesis: *Effect of climatic and anthocyanin variables on zoning of Pinot Noir wine in Casablanca valley.*

Supervisor: Prof. Dr. Jorge Saavedra T.

B. Sc. 2010

Pontificia Universidad Católica de Valparaíso, Chile.

Agricultural Engineer.

Academic Experience

2023 -

Associate Professor (Tenured), Pontificia Universidad Católica de Valparaíso, Chile.

2017 - 2022

Assistant Professor, Pontificia Universidad Católica de Valparaíso, Chile.

2010 - 2017

Instructor, Pontificia Universidad Católica de Valparaíso, Chile.

2015

Graduate Research Assistant, University of California, Davis.

2007 - 2009

Undergraduate Research and Teaching Assistant, Pontificia Universidad Católica de Valparaíso, Chile.

Administration Experience

- 2023 - Member of the Board of Directors**, La Palma Experimental Station, Pontificia Universidad Católica de Valparaíso, Chile.
- 2023 - GOP – CINDA Member**, Centro Interuniversitario de Desarrollo, Chile.
- 2023 - Graduate Studies CRUCH Comission Member**, Consejo de Rectores de Chile.
- 2022 - Director of Graduate Studies**, Vicerrectoría Académica, Pontificia Universidad Católica de Valparaíso, Chile.
- 2022 Secretary of the Faculty**, Pontificia Universidad Católica de Valparaíso, Chile.
- 2016 - 2017 Executive Director**, Redes Chilenas de Investigación (ReCh), Chile.
- 2015 - 2016 Vice President**, ChileUCD, USA.

Academic awards and honors

- 2021** Associate Editor Frontiers of Plant Science
- 2020** Teaching Excellence PUCV award
- 2019** Distinguished Researcher PUCV award
- 2016** Katherine Esau Graduate Fellowship
- 2016** The Horace O. Lanza Scholarship
- 2016** The David E. Gallo award
- 2016** Henry A. Jastro Research Award
- 2013** Becas Chile. Full scholarship for doctoral studies.
- 2010** PUCV Scholarship for M. Sc. Studies.

2010 Labrador award, awarded by the Faculty of the School of Agronomy (PUCV).

Teaching

AGR 258-01 PLANT PHYSIOLOGY

This is a core course offered to second year students in the horticulture and Agronomy track. The course is a theoretical / hands-on lab experience where the students learn key mechanisms related to 1) plant-water relations; 2) photosynthesis; and 3) growth and development.

DCA021-01 BIOSTATISTICS – EXPERIMENT DESIGN AND DATA ANALYSIS

The course is offered for graduate students of the PhD program “Doctorado en Ciencias Agroalimentarias” and the MSc program. This course covers basic topics of experiment design and data analysis using R, under a frequentist philosophy.

DCA026-01 BAYESIAN STATISTICS AND MACHINE LEARNING

The course is offered for graduate students of the PhD program “Doctorado en Ciencias Agroalimentarias” and the MSc program. This course covers advanced topics in statistics, specifically Bayesian and machine learning approaches.

DCA 017-01 BIOPHYSICAL & ENVIRONMENTAL PLANT PHYSIOLOGY

The course is offered for graduate students of the PhD program “Doctorado en Ciencias Agroalimentarias”. This course covers advanced topics of plant physiology, anatomy and biophysics in relation to a changing environment.

AGR 1503/517 VITICULTURE

The course is part of a series of courses offered in senior year in the minor of Pomology. This is a theoretical-practical class that focuses on the cultivation of table grapes, delivering knowledge from basic concepts of the *Vitis* species to applied managements specific to table grape production. The course covers topics such as: the structure of the grapevine: vegetative and reproductive morphology and anatomy; developmental physiology: vegetative growth, flowering and fruiting; field management: canopy management, irrigation and nutrition; soil requirements; pests and diseases of the vine; theory, principles, and practices of pruning; plant materials and the certification process; and frost protection. Additionally, this course covers important related topics such as table grape market, new cultivated varieties, and new trends in table grape production. The course is taught together with Agronomists/Viticulturists Vicente Valdivieso, Dragomir Ljubetic, and Alvaro Azancot; include 2 field trips and is offered every year during the first semester (fall).

AGR 1563 VITICULTURE II (Grapevine Growth and Physiology)

The course is part of a series of courses offered in senior year in the minor of Viticulture and Enology. This class is well-focused on wine-grapes and most of the discussion at theoretical level is based on the needs of the wine industry. In general, the course covers the impact of physiological variables such as photosynthesis, mineral nutrition, and water relations on fruit ripening and composition. The theoretical knowledge is translated into specific vineyard practices. For this reason, the course has an important hands-on dimension where the students constantly interact with the PUCV vineyard located in the experimental station. On top of this, the course requires 1-2 field trips.

Teaching – Advising – Examination committees

UNDERGRAD ADVISING

Since June, 2017 I have guided **22** senior undergrad students in their final projects.

UNDERGRAD EXAMINATION COMMITTEES

Since June, 2017 I have been part of **36** examination committees.

GRADUATE ADVISING

Currently guiding **5** MSc theses and **2** PhD dissertation.

GRADUATE EXAMINATION COMMITTEES

Since June, 2017 I have been part of **3** MSc examination committee.
