

Features of the LMD

[Accueil](#) > [Courses](#) > [Organisation of studies](#)

Since September 2004 there are three university levels offered to students at the University :

- Firstly the bachelors degree, studies over 6 semesters (3 years)
- Secondly the Masters degree, studies over 4 semesters (2 years)
- Thirdly the PhD for those who wish to go into research after masters level (3 years).

Each study year is based on two semesters which have several modules (UE - unités d'enseignement) and give 30 credits. Students must obtain 180 credits in order to pass the bachelors course, and 120 extra-credits for the masters.

Each field of study contains a common course, plus optional modules and general sessions open to students of all disciplines.

Important to note

- Courses targeting professional integration
- Diplomas which are recognized on a European level (finished the multitude of illegible diplomas)
- Increasing possibilities to study in different places
- Subjects decompartmentalized
- It is now easier to pick up your studies at any time in your life or from wherever you are

Important to know

- The DEUG may be awarded on request following the first four semesters of the bachelors course.
- The 'maîtrise' diploma may be awarded on request following the first two semesters of the masters course.
- All existing courses are maintained, even those who have few students.
- The IUT still awards DUT diploma ('bac' + 2 years study).
- Students may still study for the competitive exams in teacher training (CAPE, CAPES, 'Agrégation'...).
